Boats, recreational vehicles and trailers must be stored in a garage/carport or be enclosed or otherwise screened from view from the street and adjacent properties. There are a limited number of on-shore storage spaces for small boats at the public areas on Spring Valley, Thagard, and Whisper lakes. Non-lake front residents or property owners may store non-trailer, hand launch watercraft in the access areas, at the risk of the owner, provided the following conditions are met:

- (1) A boat rack has been installed by the Village and there is space available on such rack. Spring Valley Lake access areas (68 and 204 Pine Ridge Drive) are limited to canoe and kayak storage only

- (4) all watercraft must be stored upside down or in a manner not to collect standing water.

There are no public docking or storage facilities for large boats.

Residents on lake-front properties are allowed to use the lake water for irrigation. A permit from the Zoning Administrator is required. A list of such users is maintained at the Village Hall and by the Lakes and Watershed Board representatives for notification purposes whenever there is an irrigation moratorium established due to chemical treatment of the lake waters. It is advisable that if residents plan to be away for a period of time and their irrigation system is set to operate on a time clock, they ask their neighbor to turn the system off in the event of an irrigation moratorium during their absence. It is helpful to provide the neighbor with instructions for operating your irrigation system. The Village is not responsible for any property damage that may occur as a result of the chemical treatment of the lakes.

The lakes are tested regularly during the warm weather months. If a hazardous or unsafe condition is noted, residents will be notified, and all or some portion of any lake may be closed to human contact. As with

any natural body of water, there will always be some level of animal waste present in the lakes.
